

29 octobre 2026 - 14H00 à 15H30

Unisanté, Route de la Corniche 21
Salle Chasseral 01 159

FEMINIST PEDAGOGIES

INTERVENANT·ES

Joelyn de Lima, Conseillère pédagogique, Centre d'appui à l'enseignement, EPFL

Amélie Puche, Responsable de recherche, Institut des humanités en médecine,
Faculté de biologie et médecine, Lausanne

Eléonore Crunchant, Chargée de recherche, Unité santé et genre, Unisanté

DESCRIPTIF

Feminist pedagogical approaches provide tools aimed at reducing social inequalities, promoting student empowerment and fostering critical thinking in the classroom. These tools are based on an approach that draws on lived experiences, connects individual experiences to structural causes and proposes collective solutions through group discussions.

However, implementing these tools within an academic institutional context, particularly in the medical field, can be challenging. How can feminist pedagogical approaches be implemented to address social inequalities in health?

This seminar will explore pedagogical and didactic methods for addressing and combating health inequalities at various levels, from the classroom to medical care and work organisation.

Drawing on their experience with feminist pedagogy, the speakers will present available tools and discuss their limitations. Joelyn de Lima, pedagogical advisor at EPFL, will present her tools and insights on how to be inclusive in the classroom. Amélie Puche, postdoctoral researcher, will present and discuss the 'Boosting Women's Careers in Health' initiative: a series of seminars aimed at creating a space for exchange, reflection and support for young female researchers working in health. Eleonore Crunchant, lecturer, will present and discuss a pedagogical initiative for teaching structural competencies in health.

Please note that Joelyn and Eléonore will present in English, while Amélie will present in French.

PROGRAMME : 60 min de présentation et 30 min de discussion

*La salle comporte 30 places mais vous pouvez également nous rejoindre sur Webex :
