

MARDI
18 OCTOBRE 2022
COLLOQUE DESS

HEURE : 11h à 12h

LIEU : Salle Delachaux

Rte de la Corniche 10

1010 Lausanne

& via Webex

Clinical pathways and healthcare quality assessment.

**Cardiovascular case studies from the Bologna Local Health Authority,
Italy**

INTERVENANTS :

■ PROFESSOR MARIA PIA FANTINI

FULL PROFESSOR IN GENRAL AND APPLIED HYGIENE AT THE UNIVERSITY OF
BOLOGNA, ITALY

DESCRIPTIF :

Current performance measurement systems are mainly designed to measure performance at the organizational level. They tend not to assess the value given by the collaboration of multiple organizations and multidisciplinary teams involved in the value creation process.

Clinical pathways (diagnostic-therapeutic pathways) are complex intervention that involve many individuals and interfaces. It is challenging to evaluate their implementation and their effectiveness and efficiency.

During the colloquium, it will be discussed how to assess the impact of healthcare pathways and cardiovascular case studies from the Bologna Local Health Authority, Italy.

Recommandé par la Société Suisse des Spécialistes en prévention et santé publique (SPHD) pour la reconnaissance de la formation continue.
